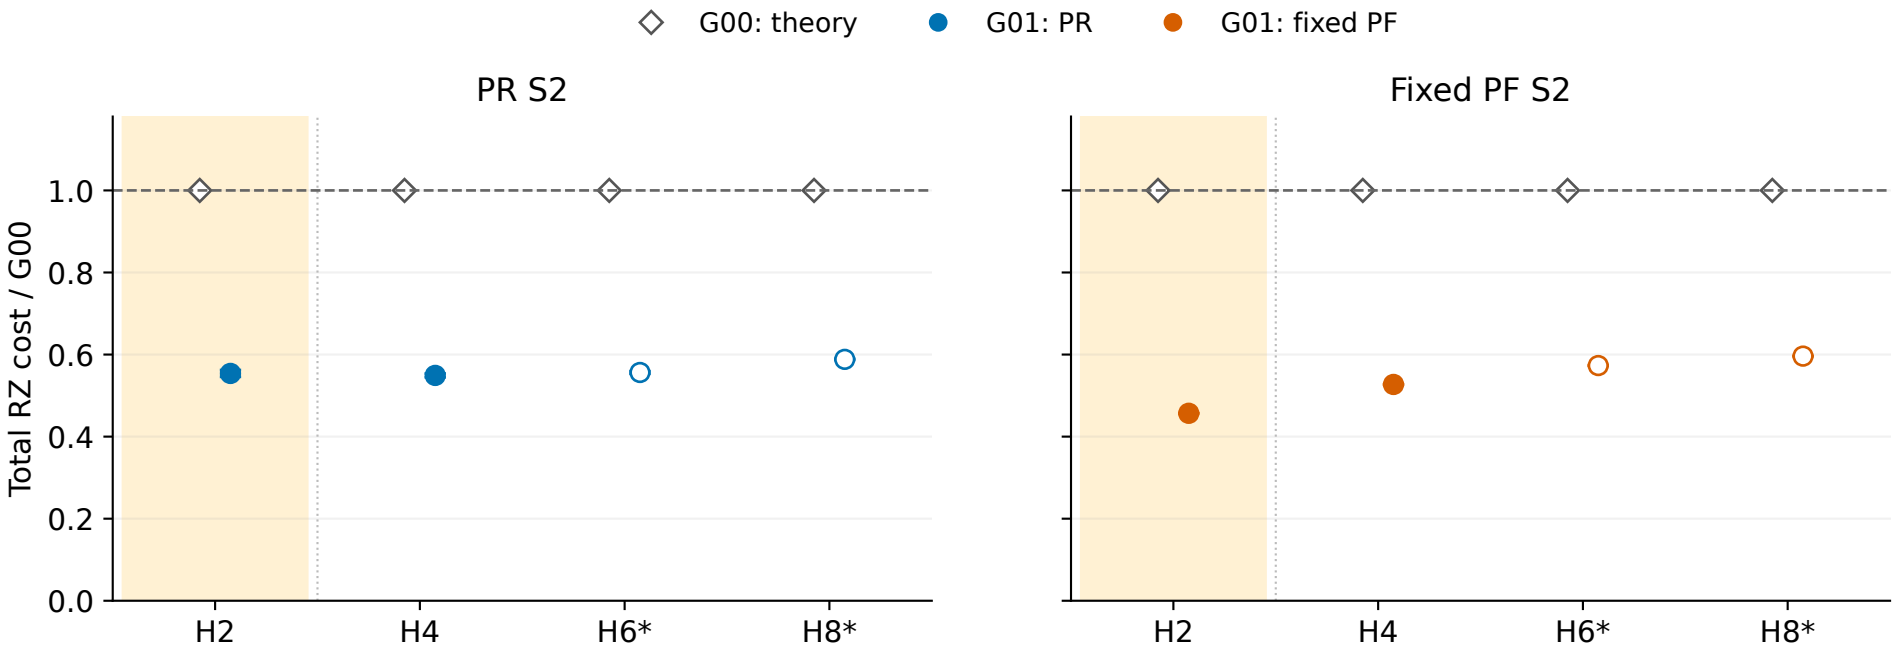
G | total cost with N fixed epsilon = 0.01

G00: theory; G01: compiled C with saved N; independent G11 unavailable

H2: recovered original n=8 | H4/H6/H8: new cohort



G01 sums N x C over both axes; PR nominal MC intervals retain paired-axis covariance

* H6/H8: conditional only; auxiliary G-operator validation failed (threshold unchanged)

Fixed candidates | linear chains, 1 A, STO-3G | T=0.8 | native RZ, not paper Toffoli resources
