Eight independent-confirmation conditions: saved point results

Supplementary presentation table · existing six-row manuscript main table is unchanged

	ε = 0.05	ε = 0.0005
H2* / DF3	PR lower REPRODUCED n = 80	PR lower REPRODUCED n = 12
H4 / DF10	PF lower NOT_REPRODUCED n = 1108	PR lower REPRODUCED n = 78
H6 / DF19	PF lower REPRODUCED n = 48	PR lower REPRODUCED n = 104
H8† / DF28	PR lower POINT_REPRODUCED n = 48	PR lower POINT_REPRODUCED n = 48

* H2: additional independent P, n80/12; not formal inclusion in the manuscript main table.
H4/H6/H8: existing main-table series. REPRODUCED refers to the prespecified direction, not always PR advantage.
† H8: full public PR execution receipts not reverified. Finite-sample points; no population-mean or unseen-event guarantee.
Linear 1 Å / STO-3G / T=0.8 / P=0; stored analytic shots × compiled RZ. Input-generation differences remain.
