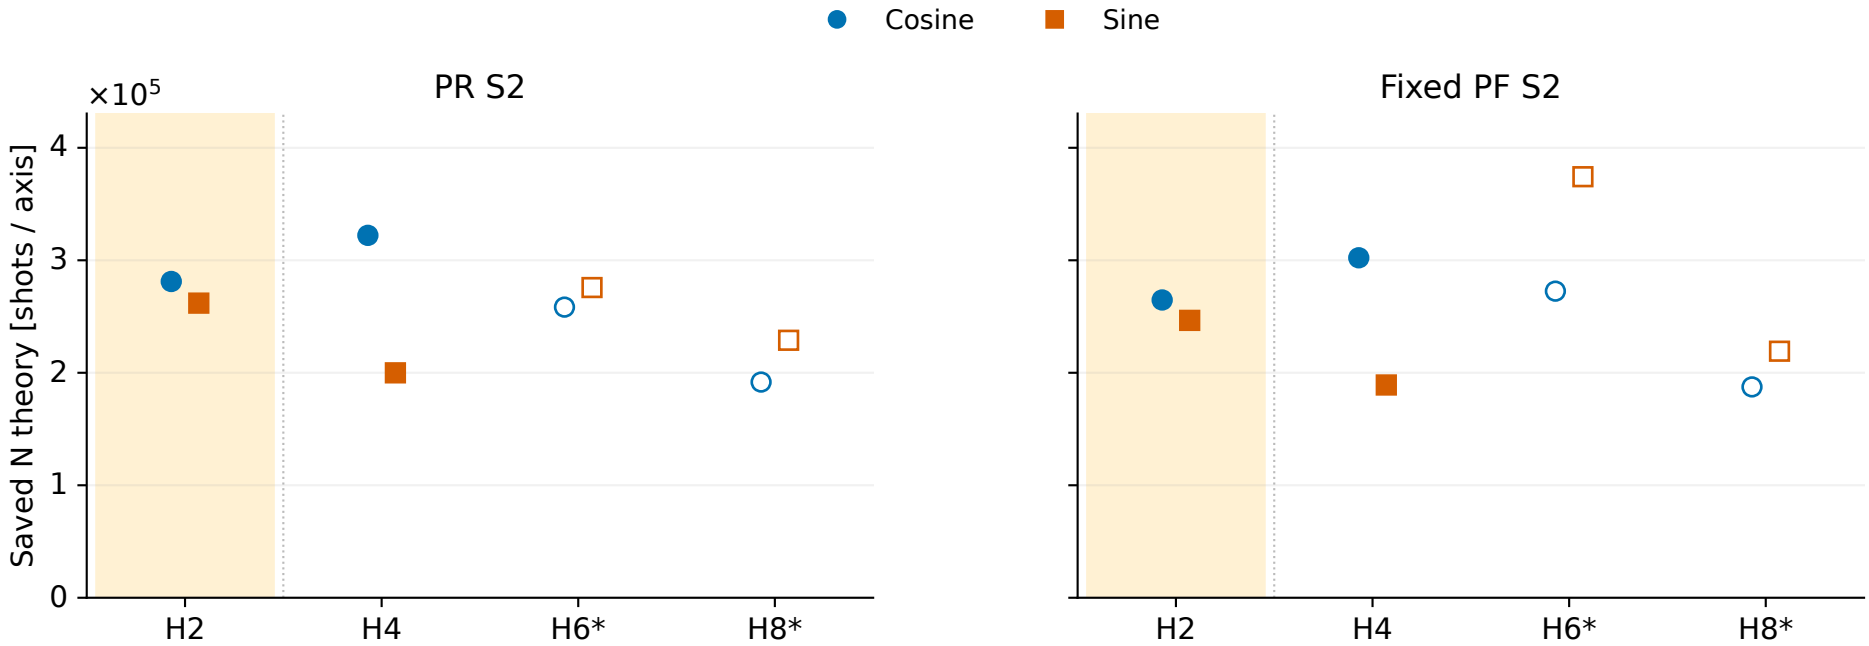
N | saved sufficient shots epsilon = 0.01

Independent circuit N is unavailable; no circuit/theory ratio is plotted

H2: recovered original n=8 | H4/H6/H8: new cohort



N is a sufficient-condition allocation with empirical numerical inputs; not measured shots

* H6/H8: conditional only; auxiliary G-operator validation failed (threshold unchanged)

Fixed candidates | linear chains, 1 A, STO-3G | T=0.8 | native RZ, not paper Toffoli resources
